REMARKS

The figures of births and deaths shown in this statement for week ending the 25th August, 1956, relate to 223 towns with an estimated population of 29,813 thousands. The total number of towns is 318 and their population is 41,584 thousands. Thus 70% of the total number of towns representing 72% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 20,799 and 8,275 representing birth and death rates of 36.3 and 14.4 per thousand of population respectively.

(a) *States (Part A and C).*—The data here relate to 185 towns with an estimated population of 25,088 thousands. Information about West Bengal could not be included. The total number of towns is 253 and their population is 33,500 thousands. Thus 73% of the total number of towns representing 75% of the total population is covered. The number of births and deaths recorded in these towns were 18,298

and 7,273 representing birth rates and death rates of 37.9 and 15.1 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) *States (Part B).*—The data here relate to 38 towns with an estimated population of 4,725 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 58% of the total number of towns representing 58% of the total population is covered. The number of births and deaths recorded in these towns were 2,501 and 1,002 representing birth and death rates of 27.5 and 11.0 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
